a true
reflection
of your
lifestyle

Give us your take on 'The Inside Story'

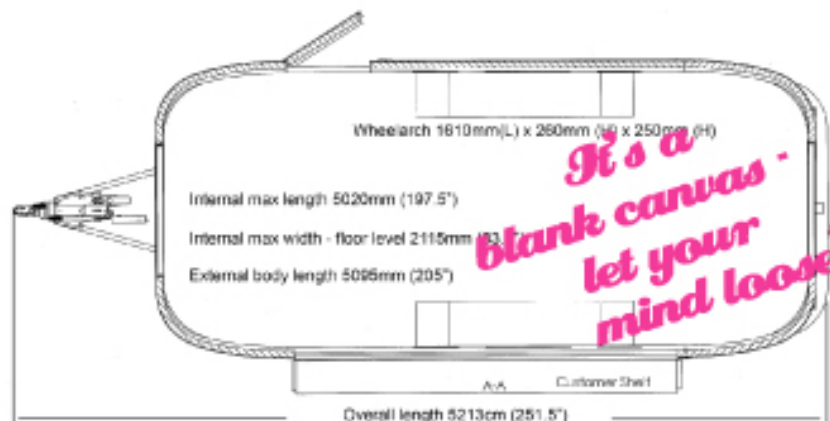

It's your baby, so it's your call. Our bespoke design and fitting service will ensure you get EXACTLY what you want on the inside of your Silver Bullet.

Whether it's a purpose-built commercial unit for selling your wares or promoting your business, or a personal space for relaxing and having fun, we can advise and help you to plan your dream.

When you head out onto the open road, you'll enjoy a great sense of satisfaction, having been part of the design process from start to finish.

Start the journey the way you mean to go on - in style!

Just one example of how we can help you plan the interior layout of your Silver Bullet

* with the help of our expert designers of course

What's Your Favourite Colour?

The interior can be tailored to your personal taste with a wide range of fabrics, accessories and lighting.

Length: 23ft 6ins / 716cm
Width: 7ft 5ins / 226cm
Height: 8ft 10ins / 269cm
Typical unladen weight: 1590kg*
Max. gross weight: 2700kg

What we put into it...

Every Silver Bullet is handbuilt from the ground up. Right here in Britain.

We start with a sturdy steel ladder-frame chassis, precision welded on our own jig facility, to ensure accuracy every time. Once the chassis has been zinc galvanized for extended life, we really start to get going. Every bodyshell is hand-crafted to suit customer requirements from high-quality polished aluminium. We use non-allergenic recycled plastic bottle underfloor insulation, heavy-duty waterproof floorboard, lambswool cavity wall insulation – for the ultimate in eco-friendly cosiness – and easy-care anodised aluminium for internal walls. Special stormproof marine-grade windows and ultra-modern, low-energy LED external and internal lighting complete the unique retro-modern Silver Bullet look.

The flexibility of our design-and-build process means that Silver Bullets can easily be constructed as touring vans, commercial promotional units or catering trailers. We have a wide variety of quality materials to choose from, when it comes to completing the interior to your own tastes, whether it's a funky '50's-style weekend tourer, or a space-age stainless-steel catering unit. And there's a wide range of options to suit different budgets, from simply retro to high-tech 21st-century luxury. Blown air central heating, air-conditioning, shower rooms with electric-flush toilets, and top-quality built-in caravan movers are just a few of the options available. Tell us what you want, and we'll help you to create your own dream machine!
